Memo to ~~Coal~~ File:

RE: Inspection of the Glade Pit
ACT/037/015
San Juan County, Utah

On July 13, 1982, Tom Tetting, Sandy Pruitt and Sue Linner of the Division visited the Glade Pit Mine located in the Manti-La Sal National Forest. The mine is reached via the Cottonwood Wash turnoff off highway 95 west from Blanding. After about 45 minutes a switchback up the mountains on the right is encountered. It leads eventually to the minesite.

The minesite was toured and reclamation suggestions in concert with the submitted mine plan (June 4, 1981) were made to Energy Fuels Nuclear in a letter August 10, 1982.

The Forest Service should be contacted to ascertain whether the anticipated completion of reclamation activity has been achieved.
